PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on proficiency in Python, SQL, Machine Learning, Natural Language Processing (NLP), and Generative AI conversational systems. Proven track record architecting end-to-end analytics pipelines, predictive classifiers, commercial business intelligence dashboards, and cloud-hosted production APIs. Adept at transforming complex datasets and unstructured multilingual communications into actionable software solutions.

TECHNICAL SKILLS & COMPETENCIES

Programming & Full-Stack:	Python (Advanced), SQL, MySQL, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Machine Learning & NLP:	Scikit-learn, Google Gemini API, TF-IDF Vectorization, Topic Modeling (LDA), Logistic Regression, NLTK, Text Preprocessing
Data Analytics & BI:	Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Chart.js, Plotly, Streamlit, Matplotlib, Seaborn, Excel
Cloud Deployment & Tools:	FastAPI, Netlify, Render Cloud, Git, GitHub, VS Code, Jupyter Notebook, Google Colab

FEATURED PROJECTS (PART 1 - AI, NLP & WEB ANALYTICS)

1. Krish Chatbot – Multilingual AI Assistant & Auth Portal

Live Cloud Application

Tech Stack: Google Gemini API, JavaScript, Tailwind CSS, LocalStorage, Marked.js, Netlify

- Engineered a conversational AI assistant with animated typewriter streaming and a specialized persona supporting Tanglish, Tamil, and English.
- Implemented client authentication with instant one-click demo login, persistent session history, theme switching, and Markdown code highlighting with copy controls.
- Integrated exponential backoff retry algorithms for reliable API query throughput and deployed live on Netlify.

2. SentixAI – E-Commerce Sentiment Analysis & Topic Extraction

Full-Stack Cloud NLP

Tech Stack: Python, FastAPI, Scikit-learn, Latent Dirichlet Allocation (LDA), JavaScript, Render, Netlify

- Engineered an end-to-end NLP web application to classify e-commerce consumer reviews into Positive/Negative sentiments with live confidence probability scoring.
- Trained and implemented LDA with TF-IDF vectorization to identify latent feedback topics (delivery delays, packaging defects, quality issues).
- Architected a decoupled production architecture: deployed a FastAPI backend on Render and integrated an interactive frontend on Netlify.

3. Nike Sales Intelligence & Analytics Portal

Live Interactive Web Analytics

Tech Stack: JavaScript, Chart.js, HTML5, CSS3 (Neon Dark Theme), Netlify

- Developed an executive commercial sales dashboard with dynamic category slicers (Men, Women, Kids) updating real-time revenue, margins, and profit metrics.
- Implemented responsive interactive visualizations using Chart.js including profit by product line, discount tier distributions, sneaker market share, and revenue trends.
- Engineered role-based authentication, tabular regional sales breakdown, CSV data upload capabilities, and one-click PDF reporting; deployed live on Netlify.

4. International Debt Analysis Dashboard

Data Analytics & Visualization

Tech Stack: Python, Pandas, MySQL, Plotly, Streamlit

- Conducted in-depth exploratory data analysis on World Bank multilateral external debt records across multiple countries, querying aggregate metrics via SQL.
- Engineered an interactive Streamlit and Plotly visual dashboard allowing users to filter debt trends by economic indicators, regions, and repayment profiles.

5. AI Scam Message Detector

NLP & Classification

Tech Stack: Python, NLTK, Scikit-learn, Text Preprocessing, Streamlit

- Developed a text-mining classification pipeline designed to flag fraudulent SMS and email communications using tokenization, stop-word filtering, and classification algorithms.
- Structured codebase into decoupled frontend and backend units with comprehensive evaluation metrics for precision and recall.

ADDITIONAL TECHNICAL & SOFTWARE PROJECTS (PART 2)

6. Sales Management System & Intelligence Hub — **Enterprise Application**

Tech Stack: Python, Streamlit, MySQL, Relational Database Design

- Architected a multi-branch enterprise sales application to track daily commercial transactions, customer purchase history, and outstanding receivables.
- Automated balance calculations and SQL ledger validation, eliminating billing discrepancies and speeding up financial auditing routines.

7. COVID-19 Global Trend & Time-Series Analysis — **Exploratory Data Analysis**

Tech Stack: Python, Pandas, Matplotlib, Seaborn, NumPy

- Performed exploratory time-series analysis on global epidemiological datasets tracking confirmed infections, mortalities, and recovery trajectories.
- Engineered derived metrics (recovery ratios, case fatality rates) and generated comprehensive visual trend summaries using Matplotlib and Seaborn.

8. Supermarket Billing & Inventory Management System — **Desktop & Database Application**

Tech Stack: Python, Tkinter, MySQL, Database Normalization

- Designed and built a graphical desktop application managing inventory catalogs, shopping cart calculations, GST tax computation, and receipt generation.
- Implemented structured MySQL schemas to maintain persistent product data, customer accounts, and real-time inventory level deductions.

9. Online Store Sales Analysis & Your Savings App — **Analytics & Cross-Platform Prototype**

Tech Stack: Python, Pandas, Matplotlib, Flutter, UI Design

- Conducted retail e-commerce sales performance analysis in Python, automating sales charts and generating structured analytical PDF summary reports.
- Prototyped "Your Savings App" in Flutter featuring authentication, personal financial ledger dashboards, savings goal trackers, and payment workflows.

INTERNSHIP EXPERIENCE

UI/UX Design Intern – CAD Export — **June 2025 – August 2025 | Tenkasi, Tamil Nadu**

- Acquired hands-on exposure to user research, wireframing, component-based user interface design, and interface usability standards.
- Directly applied modern UX design principles to create clean user flows, dashboard layouts, and interactive web visualization tools.

EDUCATION

B.E. in Computer Science & Engineering — **2022 – 2026**

Satyam College of Engineering and Technology, Tamil Nadu

CERTIFICATIONS & ACCREDITATIONS

- **HackerRank:** SQL Certification & Problem Solving
- **Data Science & AI:** Basics of Data Science Certification
- **Machine Learning:** Basics in Machine Learning Certification

CORE COMPETENCIES & STRENGTHS

- **Technical:** Exploratory Data Analysis (EDA), Machine Learning Algorithms, Predictive Modeling, Data Wrangling & Cleaning, Relational Database Schema Design, REST API Integration, Dashboard Development.
- **Interpersonal:** Analytical Problem Solving, Quick Learner, Continuous Technical Upskilling, Collaborative Mindset, Clear Communication.
